## **RESTRICTION**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1**, drawn to a burr removal and hole forming apparatus, classified in class 83, subclass 621.
- II. Claims 2-4**, drawn to a forging die apparatus, classified in class 72, subclass 352.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as being used on non-disk shaped parts such as elongated workpiece where workpiece is forged without the necessity of providing a region for punching the workpiece. Alternatively, the invention I has separate utility such as being used on a workpiece that has been forged by a conventional forging die apparatus of opposed dies with each die being one-piece, non-interfitted die structure. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3725

## **ELECTION**

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
